Work Experience

Software Engineer II, JazzHR - Pittsburgh, PA   May 2021 - May 2022
- Worked closely with other developers and product team to extend support for franchise customers, adding functionality to support businesses with multiple locations and larger employee bases
- Lead initiative to improve accessibility of career pages resulting in improved ease-of-use, SEO, and performance
- Made improvements to logging for better observability of asynchronous task framework
- Assisted platform team in migrating message queueing infrastructure to Kubernetes and rolling out PHP and Symfony version updates

Software Developer, PNC Bank (contract) - Pittsburgh, PA   December 2019 - July 2020
- Refactored legacy templating system, eliminating a dependency with known security vulnerability
- Shared responsibility of generating, deploying, and testing daily builds across environments
- Increased unit test coverage for Angular components to comply with stricter code quality requirements

Software Engineer, eBenefits Solutions LLC (contract) - Pittsburgh, PA   April 2019 - December 2019
- Developed a landing page preview feature that gave administrators control over page content and layout
- Created custom Angular components and services to be used across the application
- Worked closely with front-end team to establish code organization standards

Application Developer, BNY Mellon (contract) - Pittsburgh, PA   August 2018 - April 2019
- Shared ownership of enterprise entitlements API and internal access provisioning portal
- Automated manual access provisioning workflows used in onboarding new employees
- Coordinated with off-shore team to asynchronously debug and refactor stored procedures

Software Engineer, Juvare - Pittsburgh, PA   October 2016 - August 2018
- Updated message delivery framework to support contact method preferences for incident responders
- Lead effort to develop and deploy a customizable reporting feature
- Updated PHP version in anticipation of support EOL and carried out compatibility testing
- Performed maintenance of the existing system including bug-fixes and delivered features to add new functionality
- Participated in project planning, code reviews, retrospectives, and sprint ceremonies

Education

Certificate in Software Development, Community College of Allegheny   2016
Bachelor of Arts, Film & Cinema Studies, University of Pittsburgh   2014
